

**BECAUSE:** We intend to create a healthy, thriving, proactive system of government that functions as effectively, efficiently, and joyfully as possible while serving the needs of all individuals, so that we can all be our best possible selves

**BECAUSE:** We believe that when individuals are supported in getting their basic physical needs met we are naturally motivated, and able, to serve all of life by contributing high quality matter and energy to others, freely and enthusiastically — and that the physical needs for humans are:

- high quality food
- clean water
- fresh air
- comfortable warmth
- inspiring light
- accurate information
- ways to freely express the body's excess solids, liquids, gasses, and energy

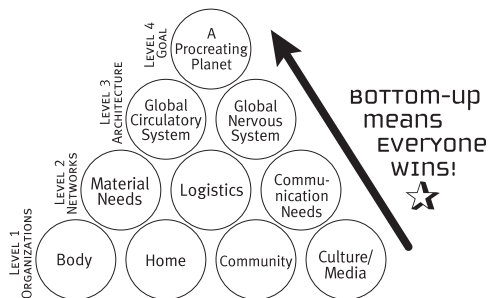

**BECAUSE:** We ourselves are motivated to invest our resources in increasing the ability of individuals' bodies, personal spaces, communities, and global culture as a whole to flourish

**BECAUSE:** We understand that the most robust and resilient systems — as in all biological organisms — are self-organizing, bottom-up, free-flowing, nurturing, cooperation-based, emergent, and decentralized

WE CHOOSE TO MAKE A STATEMENT ABOUT MOVING TOWARDS A MORE FREE, RESILIENT, COOPERATION-BASED, DECENTRALIZED GOVERNMENT BY ENCOURAGING EVERYONE TO VOTE:

(write in)  
 **EVERYONE**  
 FOR PRESIDENT

(and Prime Minister, and Chancellor, and Congress, and Parliament, and Governor, and Grand Poobah, etc.)

**BECAUSE:** We intend to create a healthy, thriving, proactive system of government that functions as effectively, efficiently, and joyfully as possible while serving the needs of all individuals, so that we can all be our best possible selves
